SUMMARY

Senior Mobile Developer with 7+ years of experience building scalable Android and Flutter applications used by banks, enterprises and tens of thousands of end users. Strong in mobile architecture (CLEAN/MVVM/MVP), security-sensitive apps, and AR-based solutions. Proven ability to own modules end-to-end and deliver high-quality releases under pressure.

PROFESSIONAL EXPERIENCE

Senior Mobile Developer - Flutter at Bottomline

Apr 2023-Oct 2025

- Developed and maintained multiple Flutter-based financial applications used by banks and financial institutions across the US and Europe.
- Implemented security and performance best practices to meet third-party compliance and regulatory audits for enterprise payment systems.
- Owned and delivered production hotfixes under tight SLAs, earning recognition from product and support teams.
- Designed and implemented a white-labelling module enabling rapid customization and deployment for multiple banking clients.
- Collaborated closely with DevOps and QA teams to streamline release workflows and improve deployment reliability.
- Conducted peer code reviews to enforce clean architecture, SOLID principles, and maintainable codebases.

Android Developer - Flutter at Vahak

Mar 2022-Mar 2023

- Developed key areas of the product, notably, Homepage, Insurance scheme, etc. Gained a clear understanding of the Flutter framework and expertise in the different architecture patterns, notably MVVM using Bloc and Provider.
- Took ownership of the modules assigned to me to make them responsive and made sure that all the edge case scenarios are taken into consideration.
- Ensured that my code is of high standards and is in line with the SOLID design principles.

Android Developer at FlippAR

Jul 2018-Mar 2022

- Built multiple Android AR applications using ARCore, Vuforia, OpenGL, and Google Vision API. Developed face detection and 2D filter overlays similar to Snapchat, enabling high-resolution image capture and processing.
- Designed and documented a complete AR module for GRT Jewellers' Oriana app, used to scan calendars distributed to millions of households across India.
- Developed the official Bangalore Airport AR application that rendered interactive digital content from printed brochures.

PROJECTS

2015- 2018

- Created an application that solves Sudoku puzzles with an interactive 2D graphical interface using constraint programming technique to solve the puzzle.
- Created a fully functional application for the Minesweeper game with an interactive 2D graphical interface using Canvas and SurfaceView framework in Android
- Worked on utility applications, notably a currency converter, and an audio player with basic features

TECHNICAL SKILLS

Mobile/ Front end Frameworks: Android (Java), Flutter (Dart), React Native

Architecture: MVVM, MVP, SOLID, Clean Architecture

AR & Computer Vision: ARCore, Vuforia, OpenGL, Google Vision API

Backend & Data: Java, SQL, Firebase, Realm

Tools & Practices: Git, Code Reviews, CI/CD collaboration

ACHIEVEMENTS

- Finalist in Techgig Code Gladiators (2017, 2018, 2024), ranking in the top 0.2% among 200,000+ participants.
- Awarded “Most Innovative Idea” at Bottomline Hackathon 2025.

EDUCATION:

Bachelor of Arts in English Literature, Andhra University

2015 to 2018

Master of computer applications, University of Mysore (pursuing)

started 2024 – 2026 (estimated)
